Peripheral Neuropathy Breakthrough!

"My feet feel like they're on fire."
"Each step feels like I'm walking through wet paint."
"I live in constant fear that I'll fall."
"I can't sleep, my hands and feet tingle all night."

What do all of these people have in common? They suffer from **peripheral neuropathy**. It's estimated that more than 20 million people in the United States have peripheral neuropathy. Unfortunately, this figure may be significantly higher, as the disease is often misdiagnosed because of its wide array of symptoms.

Dr. Amy Wolf, DACM, L.Ac., founder of Herb + Ohm Acupuncture & Integrative Medicine in the Chicago Loop, shares this belief. "I've been treating neuropathy in all its various forms for over 8 years, and so often my patients come to me because of the symptoms, not because of a diagnosis. They hear or read a testimonial of another patient and say to themselves 'hey, I feel the same thing.'" Carol W. testified to this. "I remember driving to my consultation, and I saw a woman running just outside our neighborhood. I was so envious - I just kept thinking 'I would give anything just to walk again.' My primary care doctor told me my troubles with pain and balance were just symptoms of old age and gave me a prescription. I was so depressed."

Fortunately, Carol would eventually hear from her daughter-in-law that Amy treats similar symptoms and offers a real solution at Herb + Ohm. "I just knew I had to see her. She was my last hope."

"Almost all of our patients come to us with a story similar to Carol's. They've been everywhere else. They've been told there's no hope. They've been told 'it's just a part of getting older,'" shares Vanessa, a Patient Care Coordinator at Herb + Ohm. "It just breaks my heart,

but I know how much we can help people like Carol so I'm always so happy when they walk through our door."

Peripheral neuropathy is a result of damage to the nerves, and this damage is commonly caused by a lack of blood flow in the hands and feet. A lack of blood flow results in a lack of nutrients; the nerves then begin to degenerate and die, which causes pain ranging from discomfort to debilitating. Because neuropathy is a degenerative condition, once those nerves begin to deteriorate they will continue to do so until they are completely expired, leaving those suffering with crippling balance issues. "In this case, the absence of pain is not necessarily a good thing," shares Amy. "This usually indicates that your nerves are hanging on by a fragile thread."

So how exactly is Amy able to reverse the effects of this degenerative disease? "Acupuncture has been used to increase blood flow for thousands of years, which helps to get the necessary nutrients to the affected nerves. But the real magic happens when I integrate ATP Resonance BioTherapy™. This is technology that was originally developed by NASA to expedite recovery and healing."

"I just can't say enough about Herb + Ohm," Carol shared through tears of joy. "My grandchildren live so close by, and I struggled taking walks with them and attending their activities. I always stayed home because of the pain and discomfort. Yesterday, I attended a softball game and walked with them around the block! And next week I am going with them to the beach. I am truly living life these days."

According to Carol's test results, she has seen a 74% improvement in pain and functionality, which is "on par with a majority of our patients,"

shares Vanessa. "But more important than those test results is the joy she's expressed being here and hearing about all the amazing things she's able to do because she feels great!"

By seamlessly blending the ancient science of acupuncture with modern medical solutions, Amy has achieved a 90% success rate in reversing the effects of neuropathy. She starts each patient with an initial consultation during which a sensory exam is performed.

"This not only aids in making a proper diagnosis but it helps to define just how much nerve damage has occurred," says Amy. "This is important because if a patient has suffered more than 95% damage, there is little that I can do to help them. I'm familiar with the medical miracle, but I know my limits as a practitioner and the limits of my medicine." When it comes to treating peripheral neuropathy, regardless of its origin, early detection greatly improves your chances of a full recovery.

If you or someone you love are suffering with chronic pain that presents as burning, tingling, or 'pins and needles,' or you've recently been diagnosed with peripheral neuropathy, it's important to know that there are options.

There is hope. **Call 312-757-1882** to schedule an initial consultation or visit herbandohm.com to read more incredible success stories.
