"It is not right to take the food of the children and throw it to the dogs." She said, "Please, Lord, for even the dogs eat the scraps that fall from the table of their masters." Then Jesus said to her in reply, "O woman, great is your faith! Let it be done for you as you wish." And the woman's daughter was healed from that hour. — Mt 15:26b-28

St. Rose of Lima | August 23

Born Isabel Flores de Olivia in April 1586 in Lima, Peru to Spanish colonists, Saint Rose of Lima took the name Rose at her confirmation in

1597. Legend holds that she received this nickname as an infant because a servant saw her face transformed into a rose.

Even as a child Saint Rose was dedicated to Christ. Growing up she made many secret penances. And when she was old enough to be married, deterred suitors by cutting off her hair and rubbing pepper on face to make it blister. She took a vow of chastity even though her parents wished her to marry. She fasted many times a week and permanently abstained from meat. Eventually her parents gave in and allowed her to join the Third Order of St. Dominic, although she was not permitted to live in a convent. Saint Rose undertook severe penances, allowing herself only two hours of sleep a night in order to have more time to pray, inside imitating Christ's crown of thorns, and even burning her own hands. However, she also cared for the sick and hungry, and sold her beautiful embroidery and fine lace, as well as flowers she grew to help raise funds for the poor.

Health & Wellness Corner Tip of the Week

EYE HEALTH: The leading causes of blindness and low vision in the United States are primarily age-related eye diseases ; this week we review cataracts.

Cataract: the most frequent cause of age-related vision loss

What is it? a clouding of the lens, which is the part of the eye that focuses light

Causes: aging, diabetes mellitus, use of certain drugs, smoking, alcohol consumption, unprotected exposure to ultraviolet radiation, and nutritional deficiency.

Symptoms: blurred or hazy vision, reduced intensity of colors, increased sensitivity to glare, increased difficulty seeing at night

Treatment: most commonly surgery to remove and replace the lens with an artificial one. Surgery can greatly improve vision in people with severe cataracts

Prevention: There is no proven therapy to either prevent cataract formation or slow progression of lens opacity once it develops. However, observational studies suggest a

healthy diet rich in fruits and vegetables, and smoking cessation.

To learn more about deciding if surgery is right for you, read on!
