MONTH FOUR - Developing Baby "I had a dream!" Your baby's brain has begun maturing. A process that will continue until she is about 14 yrs old. Her eyelids are now sealed and will re-open at 7 mths. Her taste buds are now working. Nutrients consumed by her mother are passed on to her within an hour or two. Three hundred quarts of fluid a day are sent to the baby via the umbilical cord. Fine hair begins to grow on head, eyebrows and eyelashes. Facial expressions similar to parents of the baby can be seen at this time. This month REMS (rapid eye movements) have been recorded - a sign of dreaming. Your baby is about 9 inches in length.
