Address: 1603 McDonald Ave, Brooklyn, NY 11230, USA

Phone: (718) 265-6699

Description: Living in Brooklyn and looking for a dentist near you? Let Dr. Lionel Abitbol and the staff at Smile By Design cover your every oral health need. Serving patients in Midwood, Borough Park, East Midwood, New Utrecht and Bensonhurst with friendly and gentle dentistry, we provide everything from dental cleanings and wisdom teeth removal to affordable dentures, dental implants, All-on-4 treatments and lumineers. We understand the frustrations of tooth pain, and work to accept same-day emergency appointments to help treat everything from toothaches, cracked crowns and other dental emergencies. As a general dental practice serving Brooklyn and surrounding areas such as Flatbush, Bushwick, New Utrecht and Bensonhurst, Smile By Design provides personalized dental care for each patient we see. Given our unique bond of being both a dental practice and dental lab, we offer many products and services that aren't available in traditional dental offices. Many dental practices advertise same-day dentistry services, at Smile By Design, we live it. While certain dental offices may be equipped with in-office milling equipment capable of milling basic inlays and onlays, they don't provide the superior quality offered by 5-axis milling seen in dental labs. Our unique partnership blending both dentist and lab capabilities allows Smile By Design to truly produce the most superior restorative products available. When taking a traditional impression, patients often complain about the messy cleanup, discomfort to their gums, and an unsettling gag reflex while their impression sets up. We've eliminated all the problems that come with using traditional impressions by taking completely digital impressions using our 3Shape TRIOS intraoral digital scanner. We can quickly map an exact impression of your dentition without causing you any pain or discomfort, significantly reducing your chair-time. We provide various cosmetic restorative solutions, so that our patients can leave Smile By Design looking their best. From teeth whitening and makeover services to veneers and full mouth reconstructions, we offer multiple cosmetic services to meet individualized, patient-specific needs. We strive to provide patients with personalized, affordable dental care, and that starts by offering special promotions to our valued patients. Get the most for your money by visiting our special offers page to learn more. Dental implants are made to offer a base for replacement teeth that appear, feel and function like natural teeth. Patient's that receive dental implants regain their ability to eat without discomfort, smile confidently and speak clearly. Although cutting-edge in nature, dental implants preserve more natural dentition than traditional bridgework, since implants do not utilize neighboring teeth for support. The decision to straighten your teeth affects not only your smile, but your daily life as well. As an adult seeking orthodontic treatment, you may be hoping to enhance your smile for social or business reasons. Or, maybe you're a teenager or the parent of a teenager searching for an effective, yet state-of-the-art solution. Whatever situation you may be in, Invisalign and Invisalign Teen can provide a simple solution to improve your smile without having to use traditional, metal braces. Learn more about the entire Invisalign treatment process by viewing our Invisalign product page.
